	Medium 24mm	101041852
	Large 27mm	101041853
	X Large 30mm	101041854

Understanding Medela's breast shield sizing

Pumping should not hurt. For maximum comfort and pumping efficiency, Medela offers multiple breast shield sizes*. This guide is a starting point to help determine your optimal size based on your nipple diameter.

Step 1

Using a ruler or measuring tape, measure the diameter of the nipple at the base (across the middle) in millimeters (mm). Do not include the areola.

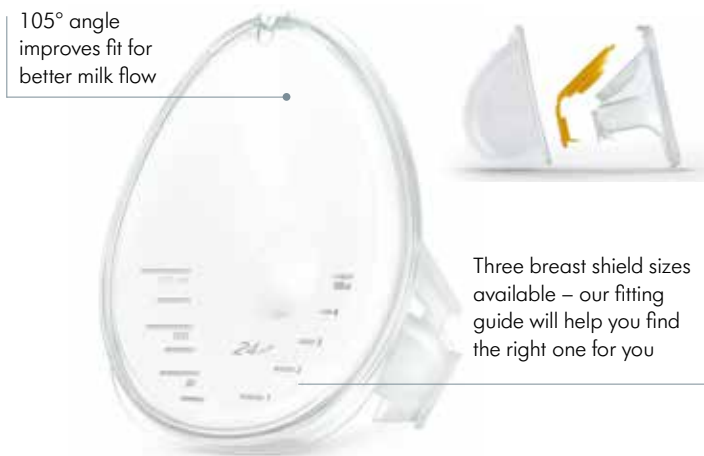

Step 2

Based on the measurement, determine the Medela breast shield size.

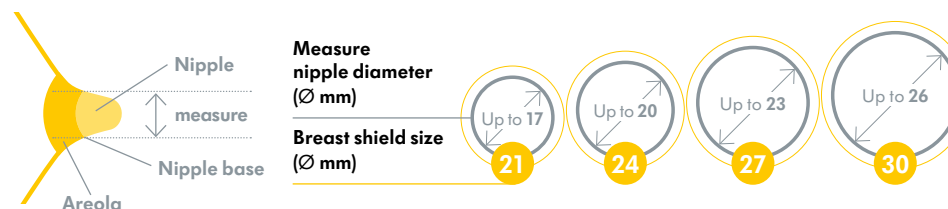

Example: If the nipple size measures 16 mm in diameter, the recommended Medela breast shield size is 21 mm.

Hands-free breast shields

Please note that the Collection Cups are not included

Freestyle Hands-free Breast Shield		
RRP \$37.95	Small 21mm	101045040
	Medium 24mm	101045051
	Large 27mm	101045056

Hands-free Collection Cups

One Pump, Two Ways of Pumping

With Medela's Hands-free Collection Cups you can add an additional way of pumping to your classic pump set, giving you the freedom to choose your way of pumping and collecting milk with only one pump. The Hands-free Collection Cups are compatible with the Freestyle™ Hands-free, Freestyle™ Flex, and Swing Maxi™ only.

Hands-free Collection Cups Features & Benefits

Anatomic shape: The Hands-free Collection Cups are designed to fit your breast shape for effective milk expression and comfort.

Ultra-lightweight: The Hands-free Collection Cups are amongst the lightest available (76g / 2.6oz each) and designed to fit comfortably and discreetly in your bra.

3 parts, easy to clean and assemble: Medela's milk collection cups are dishwasher safe (on the top rack only) making pumping less time consuming.

Transparent design: Makes it easy to check that you are placing your nipple correctly into the tunnel, preventing rubbing and supporting effective milk expression. The see-through cups help you notice when and how your milk is flowing.

Plug and pump: The Hands-free Collection Cups are quick-to-connect to your Freestyle™ or Swing Maxi™ and you're ready to go!
